Subject: Microsoft settlement

With regards to the settlement for Microsoft, we believe it will be in the best interest in the economy and the consumer to settle this case as soon as possible. The nine states that are holding out apparently are doing it with the interest of companies in their state that are competitors of Microsoft. Microsoft should be able to inovate and press forward on the various aspects of technology. The technology companies that are on the stock market all suffered with the continous pursuit of this suit against Microsoft. We hope this soon will be over . Thank you.
